REF

concrete table lamp

1.5 KG

CE IP20

***REF**, which is the contraction of the word reflection, is a concrete table lamp that illuminate reflecting light on it own body. It is produced pouring the concrete in an elastic mold and then, has solidify is extracted and carefully finished by hand. Each product, due to the characteristic of the material from which is made, is slightly different and this make it kind of unique. The concrete used in the production has superior quality in term of detail reproduction and resistance. Is an object made to last.*

PIN

concrete floor light

Few are the materials that, like concrete, are able to interpret the concept of strength so well, but also of plasticity and lightness at the same time. It is in this dualism that his formidable expressive power is expressed. Versatile like few others, it has a dense, almost velvety surface that makes each piece unique. PIN is an outdoor lamp in concrete, of three possible sizes, designed by Gian Paolo Venier for Urbi et Orbi in 2022.
